Preserve Your Shore

Shoreline Incentives Program

We love our lakes and rivers here in Burnett County

We believe that keeping our shorelines natural is one of the best ways to ensure their enjoyment for many generations.

Natural shorelines

Keept the water clean by filtering runoff and holding the soil in place.

Provide a home for a diversity of creatures.

Create natural, northwoods beauty.

Allow you to access and enjoy the water.

You can help by preserving your shoreline

If the vegetation along your shoreline hasn't been altered except for minimal clearing to allow access to the lake, we urge you to maintain it. You are doing your part to preserve Burnett County shorelines.

If your shoreline has been cleared extensively, financial and technical assistance are available to reestablish native vegetation. You can then take steps to preserve this new shoreline buffer over the long haul.

While shoreline regulations preclude removal of vegetation and in some instances require replanting the shoreline, we are asking for an additional voluntary commitment. We ask that you show this commitment by placing a covenant on your property stating that your shoreline will remain natural. This covenant allows a thirty-foot wide viewing and access corridor to the lake or river.

We'd like to show our appreciation

We'll pay you to enroll in the program. A payment of \$250 will follow an inspection that certifies your property meets program standards once the shoreline covenant is recorded.

You'll receive a classy shirt that identifies you as a natural shoreline supporter to your friends and neighbors. We'll ask that you place a small sign identifying your commitment at your shoreline. (Use of the sign is optional & not a requirement of the program)

And we'll provide a little thank you each year when up to \$50 (based on the tax amount for that parcel) is refunded directly to you.

Please complete and return this form for each parcel you wish to sign up for the Shoreline Incentives Program.
